

Are you **confident** in your organization's shot peening program?

Improve your process with comprehensive shot peening training on these topics

- **Understanding and controlling intensity and coverage**
- **Machine set-up, maintenance, and troubleshooting**
- **Media selection**
- **Inspecting the completed process**
- **Record-keeping for audits and specifications**
- **and much, much more**

We Offer Workshops and On-Site Training

The Advantages of Workshops

- Classroom instruction in every aspect of the shot peening process
- Professional instructors that are experts in their fields
- Opportunity to network with work associates
- Free trade show of the industry's best products and services

The Advantages of On-Site Training

- Classroom instruction by experienced trainers
- Training for staff members that can't travel to a workshop
- Train on your own equipment
- Program can be customized to your work environment and needs

Attendees in either program can take Certification Exams in shot peening and flapper peening and earn Certificates of Achievement

Our courses are approved by the FAA. If you're a FAA mechanic, call to learn how you can receive credit for taking our shot peening training programs. (1-800-832-5653 or (574) 256-5001)
